V-shell Blender LVSB-A10

V-shell Blender LVSB-A10 is a V cone blender with a production rate of 15 kg at a time at a cylinder speed of 12 rpm. Features a mixing cylinder with high even mixing effects with no dead angle. Deigned for intensive mixing action with a rotation height of 1000 mm and mixing time of 3 to 10 mins.

Features

- Stainless steel outer material (304)
- Speed - 12 rpm
- Even mixing effects
- Intensive mixing action
- Homogeneous mixing on 360° rotation
- V cone blender shape results in complete discharge of product material
- Easy material charging and discharging
- Absence of shaft projection eliminates product contamination

Application

Used for the mixing of drying granule materials for pharmacy or other relative industries

Specification:

Model No	**LVSB-A10**
Maximum volume	30 L
Production (one time)	15 kg
Mixing time	3 min ~ 10 min
Cylinder speed	12 rpm
Gross rotation height	1000 mm
Power	0.75 kW
Dimensions	850 x 450 x 850 mm
Weight	70 kgs
