

Rapid Low Temperature Circulating Bath

LRTB-A32

Rapid Low Temperature Circulating Bath LRTB-A32

Rapid Low Temperature Circulating Bath LRTB-A32 is a microcomputer controlled 7 L bath with cold ring liquid circulation and cryogenic liquid with a temperature range of $-20\text{ }^{\circ}\text{C}$. Refrigeration unit with low temperature cooling pump facilitates consistent high pressure and maintenance of low temperature under working conditions of reaction experiments. Equipped with anti-corrosive circulatory system preventing traffic flow, high pressure and low pump body temperature.

Features

- ▶ Volume - 7 L
- ▶ Low temperature cooling pump
- ▶ Microcomputer controlled temperature
- ▶ Temperature and time LCD display
- ▶ Built-in liquid level monitor
- ▶ Refrigeration unit with relay, protector and capacitor
- ▶ Anti-corrosive circulatory system

Specifications

Model No	LRTB-A32
Volume	7 L
Temperature range	$-20\text{ }^{\circ}\text{C}$
Refrigerating capacity	1538 W
Pump flow	20 L / min
Temperature stability	$\pm 0.5\text{ }^{\circ}\text{C}$
Head of delivery	10 m
