Vertical Laminar Flow Clean Bench

Vertical laminar flow clean bench LVCB-B1 series

Vertical laminar flow clean bench LVCB-B1 series are open desktop type, compact structure separated from the power segment and combined with the equipment box perfectly and provide unmediated HEPA-filtered air vertically over the work area with class 100 purification to protect your work from contamination.

Features

- ✓ Vertical laminar flow
- ✓ Class 100 purification
- ✓ Cold rolled powder coated steel exterior
- ✓ Polished stainless steel table board
- ✓ Separated from the power segment
- ✓ Combined with the equipment box perfectly which avoids cleanliness failure by air leakage and defect by vibration
- ✓ Low maintenance, noise less, stable, adjustable air system to maintain work area wind speed
- ✓ Energy saving fluorescent lamp
- ✓ Cabinet support with adjustable foot margin which can be dismantled

Applications

Vertical laminar flow clean bench finds wide applicability in: computer hard drive repair and assembly, DNA amplification, pharmaceutical compounding, preparation of agar plates, plant tissue culture, IV preparation, optics assembly: laser, camera, optical etc.
